Experiment – 7

Students Attendance System Using Zoho One (SaaS)

Aim

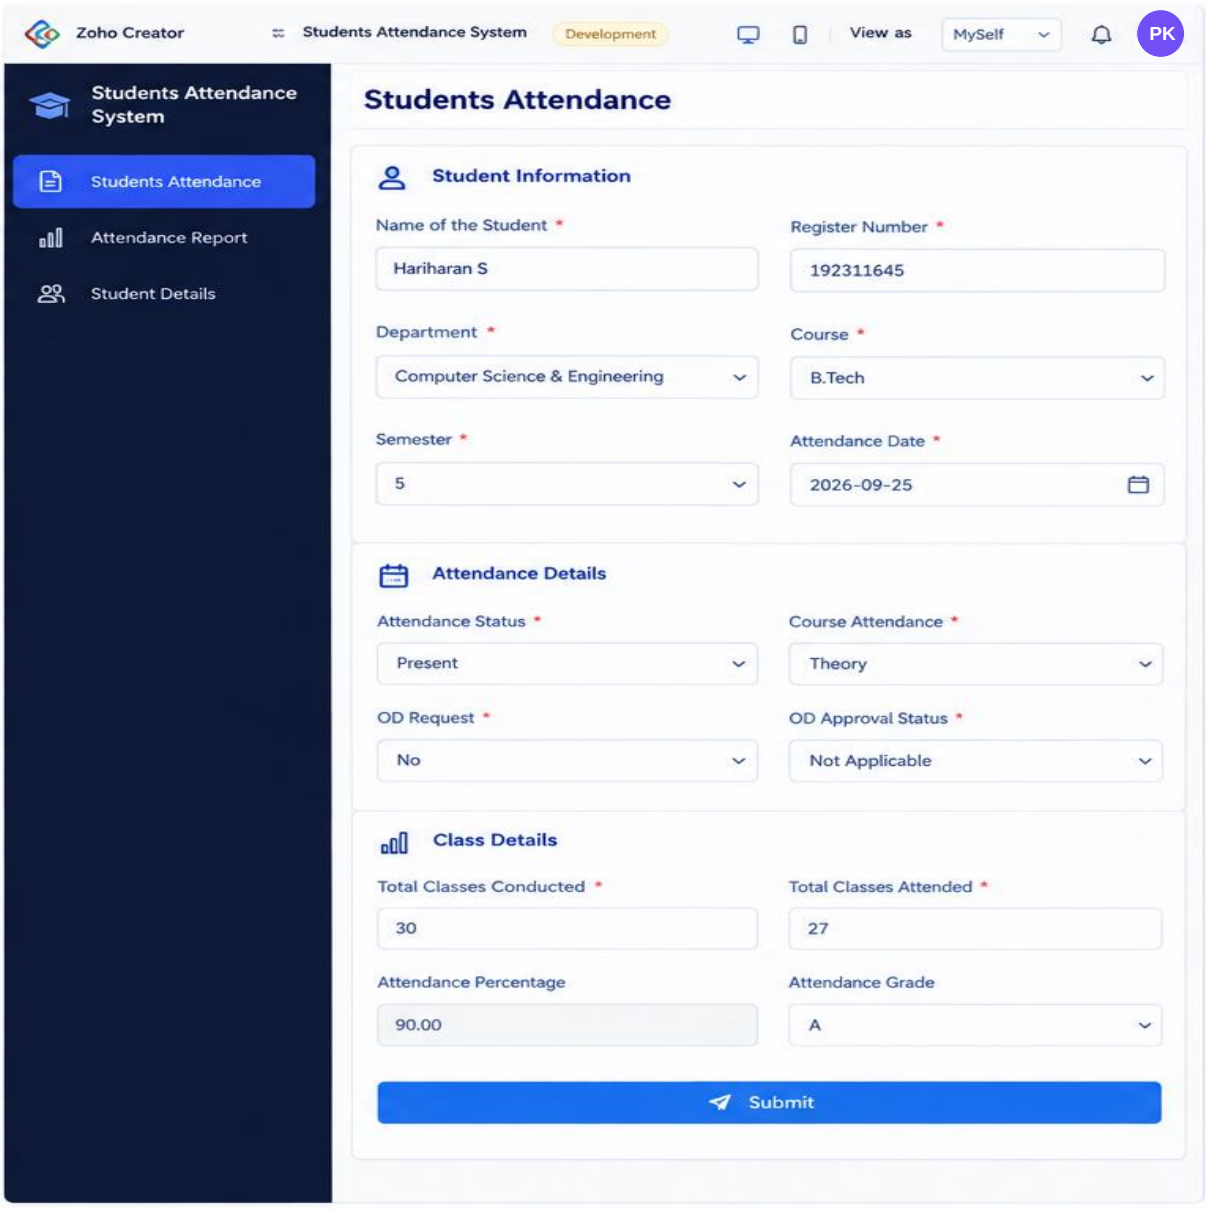

To create a Students Attendance System using Zoho One as a cloud-based Software as a Service (SaaS) application.

Procedure

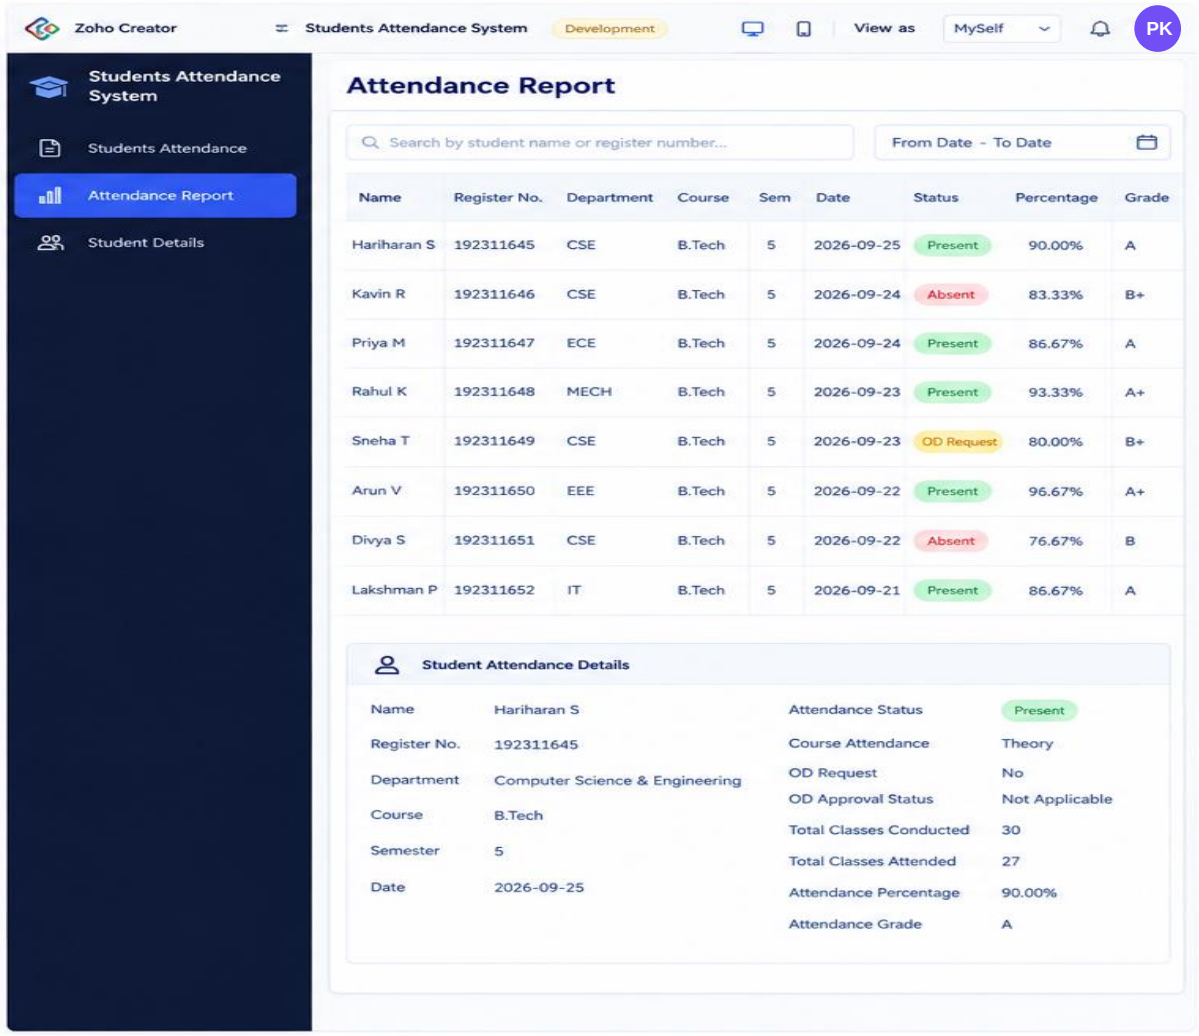

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One application.
3. Create a new application for the Students Attendance System.
4. Create a new form named **Students Attendance**.
5. Add the required fields:
    - Name of the Student
    - Register Number
    - Department
    - Course
    - Semester
    - Attendance Date
    - Attendance Status (Present / Absent)
    - Course Attendance
    - OD Request (Yes / No)
    - OD Approval Status (Pending / Approved / Rejected)
    - Total Classes Conducted
    - Total Classes Attended
    - Attendance Percentage
    - Attendance Grade
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Configure calculations to determine the attendance percentage using the total classes attended and total classes conducted.

9. Save and publish the form.
10. Enter sample student details and attendance records into the form.
11. Submit the form and verify that the entered data is stored in the cloud.
12. Test the application by entering different attendance records, including present, absent, and OD requests, and verify the attendance percentage.
13. Verify that the Students Attendance System works successfully as a SaaS application.

Input

Output

Result

Thus, a Students Attendance System was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
