LAB EXP 2

Cab Reservation Booking System Using Zoho Creator (SaaS)

AIM:

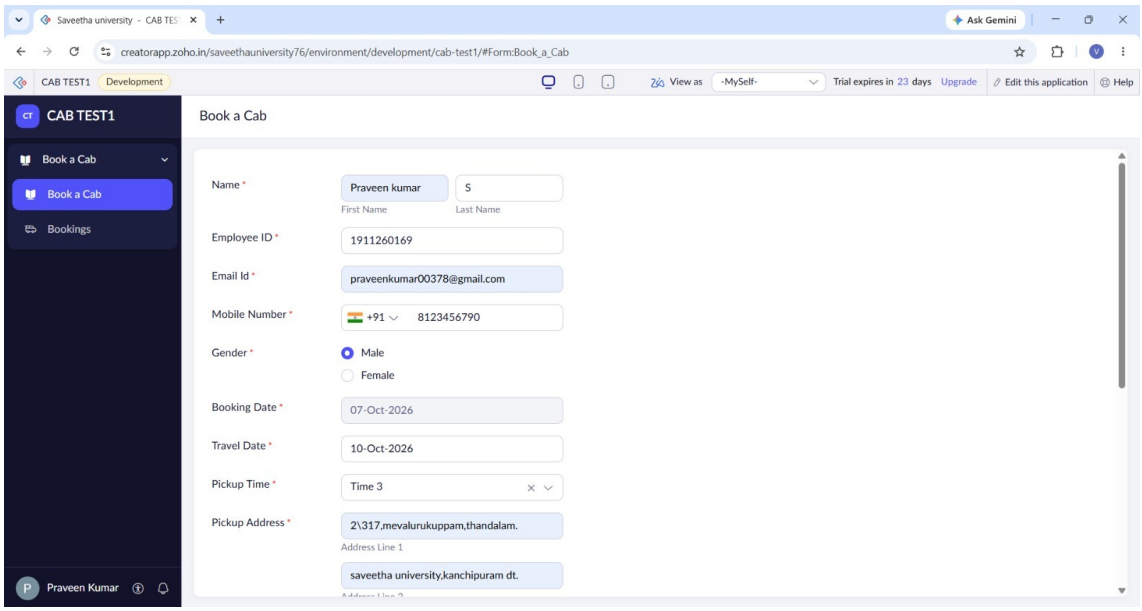

To create a Cab Reservation Booking System using Zoho Creator as a cloud-based Software as a Service (SaaS) application.

PROCEDURE:

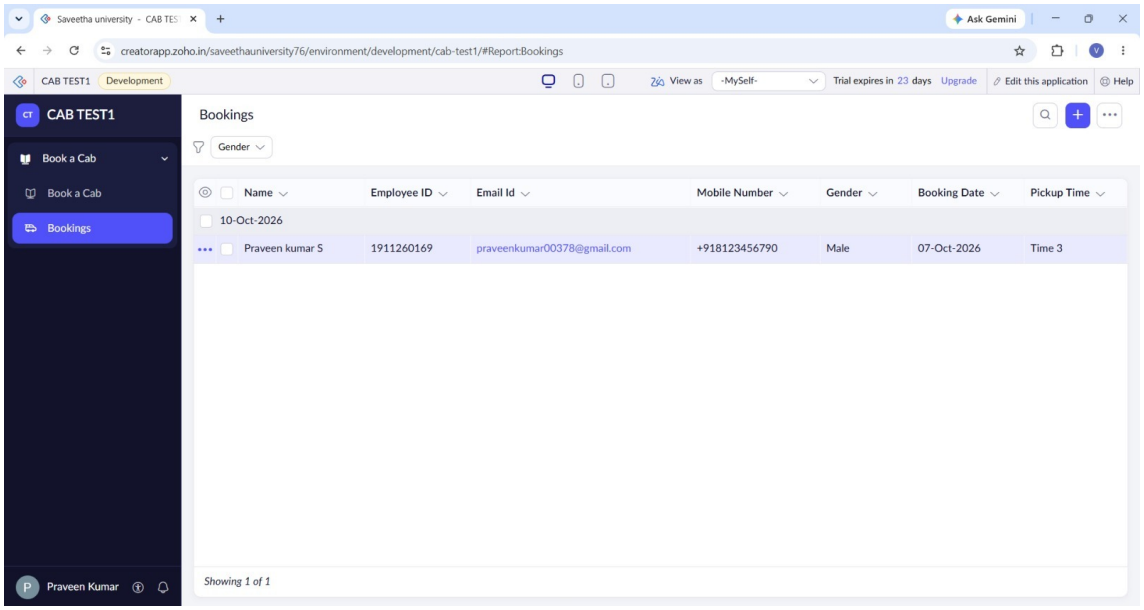

1. Log in to the Zoho Creator cloud platform.
2. Create a new application named **CAB TEST1**.
3. Create a form named **Book a Cab**.
4. Add the required fields to the form:
    - Name (First Name and Last Name)
    - Employee ID
    - Email Id
    - Mobile Number
    - Gender (Male / Female)
    - Booking Date
    - Travel Date
    - Pickup Time
    - Pickup Address (Address Line 1 and Address Line 2)
5. Configure the field types according to the data required.
6. Arrange the fields properly to make the form simple and user-friendly.
7. Save and publish the **Book a Cab** form.
8. Enter sample employee details, including contact information and travel details.
9. Submit the form to store the cab booking information in the cloud.
10. Create a report named **Bookings** to display the submitted booking records.
11. Verify the submitted employee details, gender, booking date, travel date, pickup time and pickup address.
12. Test the application by entering different cab booking details and confirming that the records are displayed correctly in the report.
13. Verify that the **Cab Reservation Booking System** works successfully as a SaaS application.

IMPLEMENTATION:

INPUT:

OUTPUT:

RESULT:

The **Cab Reservation Booking System** was created successfully using Zoho Creator. Employee details and cab booking information were stored in the cloud and displayed in the Bookings report.
