Experiment – 4

Hotel Room Booking Application Using Zoho Creator

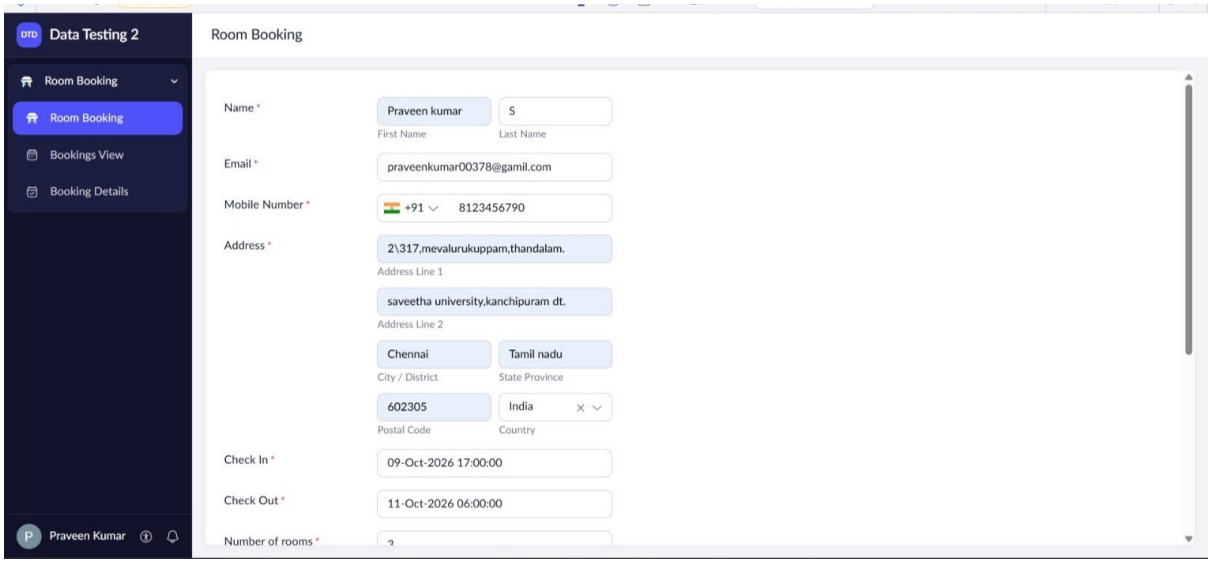

Aim

To create a simple cloud-based Hotel Room Booking application using Zoho Creator and view the booking details through a report.

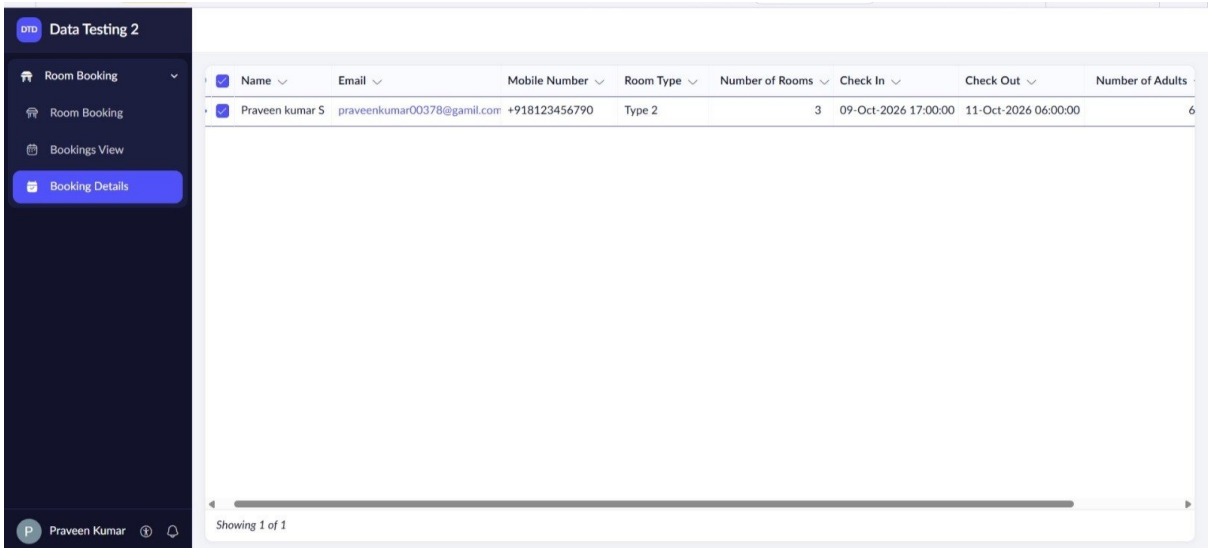

Procedure

1. Log in to the Zoho Creator cloud platform.
2. Create a new application named **Data Testing 2**.
3. Create a new form named **Room Booking**.
4. Add the required fields:
    - Name
    - Email
    - Mobile Number
    - Address
    - Room Type
    - Number of Rooms
    - Check In
    - Check Out
    - Number of Adults
5. Configure the field types according to the data required (name, email, phone, address, dropdown, number, date-time).
6. Design and arrange the form for easy user interaction.
7. Save and publish the form.
8. Open the form and enter the booking details.
9. Submit the form and verify that the record is saved.
10. Open the **Booking Details** report and check that the submitted booking is displayed correctly.

Input & Output:

1. Input – Room Booking Form (Zoho Creator)

2. Output – Booking Details Report (Zoho Creator)

Result

Thus, a Hotel Room Booking application was designed using Zoho Creator, and a booking was submitted through the form and displayed in the report, demonstrating a cloud-based application.
