LAB EXP 1

Booking a Meeting Room Using Zoho Creator (SaaS)

AIM:

To create a Meeting Room Booking System using Zoho Creator as a cloud-based Software as a Service (SaaS) application.

PROCEDURE:

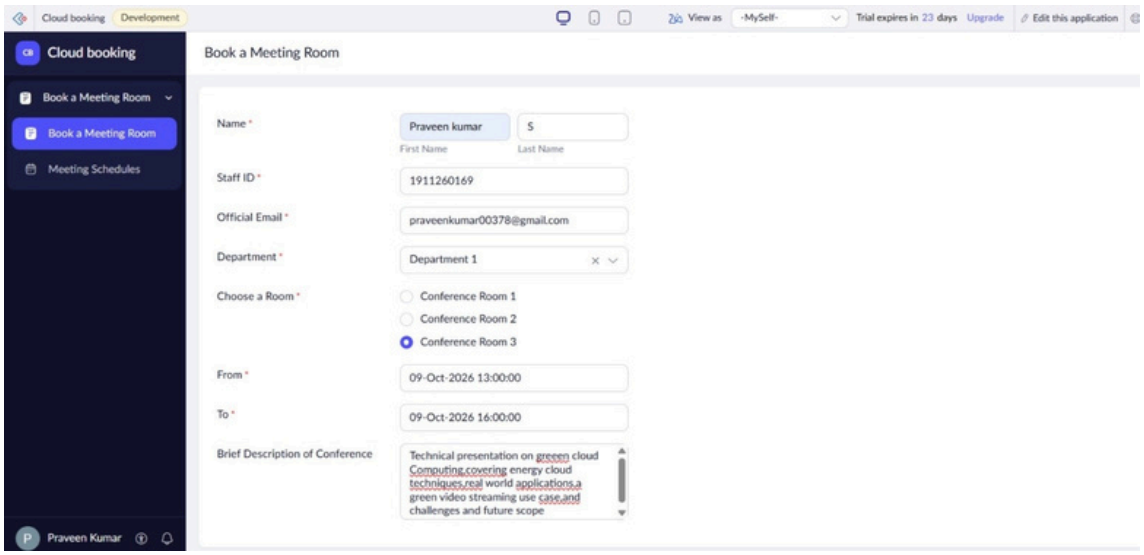

1. Log in to the Zoho Creator cloud platform.
2. Create a new application named ***Cloud booking***.
3. Create a form named ***Book a Meeting Room***.
4. Add the required fields to the form:

    - o Name (First Name and Last Name)
    - o Staff ID
    - o Official Email
    - o Department (Dropdown)
    - o Choose a Room (Conference Room 1 / Conference Room 2 / Conference Room 3)
    - o From (Date and Time)
    - o To (Date and Time)
    - o Brief Description of Conference

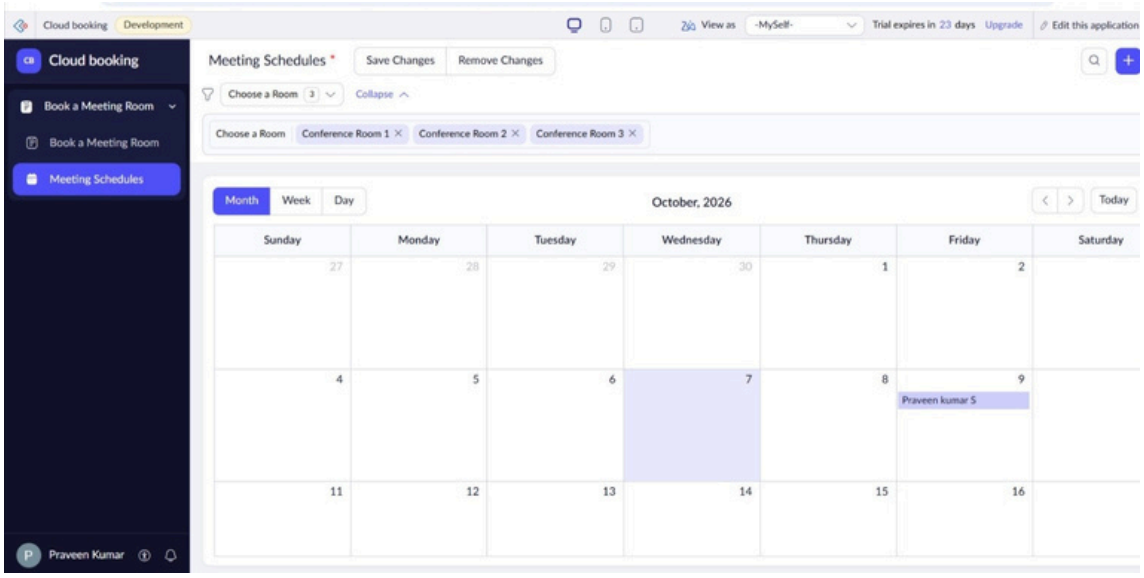

5. Configure the field types according to the required data, such as name, text, email, dropdown, radio, date-time and multi-line text fields.
6. Set the dropdown and radio options for the department and the conference rooms.
7. Arrange the fields properly to make the form simple and user-friendly.
8. Save and publish the ***Book a Meeting Room*** form.
9. Enter sample staff details, the room choice, the meeting time and a brief description of the conference.
10. Submit the form to store the meeting room booking in the cloud.
11. Create a calendar report named ***Meeting Schedules*** to display the booked meetings.
12. Verify the staff details, selected room, and the booked date and time in the report.
13. Test the application by booking different rooms and time slots.
14. Verify that the ***Meeting Room Booking System*** works successfully as a SaaS application.

IMPLEMENTATION

INPUT:

OUTPUT:

RESULT:

The ***Meeting Room Booking System*** was created successfully using Zoho Creator. Staff details and meeting room bookings were stored in the cloud and displayed in the Meeting Schedules report.
