Experiment – 7

Student Information System Using Zoho Creator

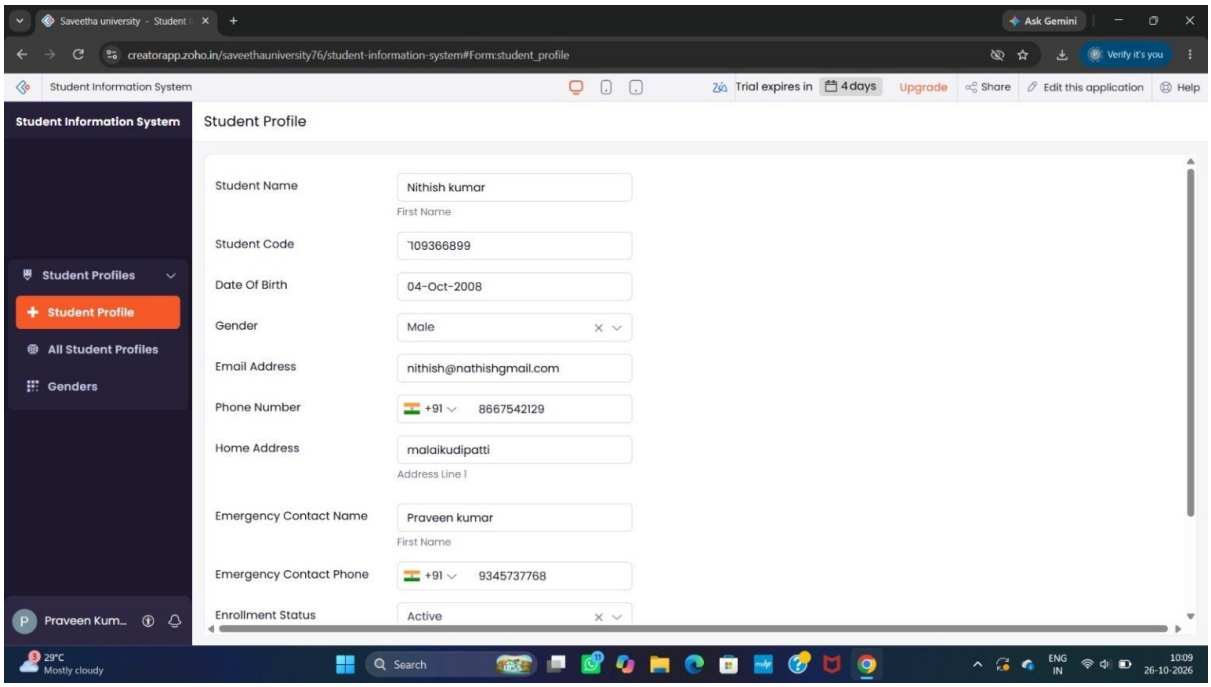

Aim

To create a simple cloud-based Student Profile application using Zoho Creator and view the stored student information through a report.

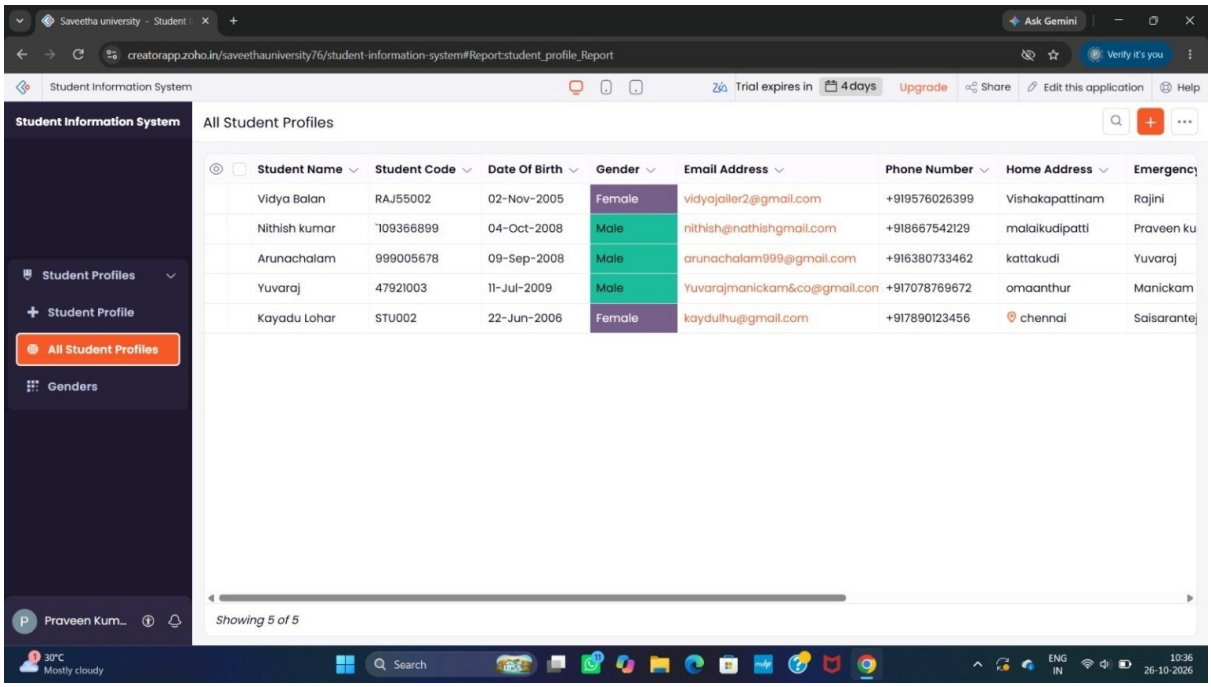

Procedure

1. Log in to the Zoho Creator cloud platform.
2. Create a new application named **Student Information System**.
3. Create a new form named **Student Profile**.
4. Add the required fields:
    - Student Name
    - Student Code
    - Date of Birth
    - Gender
    - Email Address
    - Phone Number
    - Home Address
    - Emergency Contact Name
    - Emergency Contact Phone
    - Enrollment Status
5. Configure the field types according to the data required (text, date, dropdown, email, phone).
6. Design and arrange the form for easy user interaction.
7. Save and publish the form.
8. Open the form and enter the student details.
9. Submit the form and verify that the record is saved.
10. Open the **All Student Profiles** report and check that all entered records are displayed correctly.

Input & Output:

1. Input – Student Profile Form (Zoho Creator)

2. Output – All Student Profiles Report (Zoho Creator)

Result

Thus, a Student Information System was designed using Zoho Creator, and student records were entered through the form and displayed in the report, demonstrating a cloud-based application.
